Joshua Companion

Full Stack Web Developer

PROJECTS

Volcon 3D Electric Vehicle Configurator | November 2021

- I worked with the electric vehicle company Volcon to create a 3D vehicle configurator.
- Three.JS and Next.js were utilized to add models to the web and GreenSock for triggering animations.
- I utilized blender heavily for optimizing the vehicle and addons.

Volcon Brat Shop Page

Volcon | January 2023

- Utilized provided Figma design and worked with design team
- Worked with requested functionality to implement the Shopify API
- Used React and Next.js for its speed and Dynamic serverless tools

Volcon Mobile App Backend

Volcon | July 2022

- Engineered data structure for customer and vehicle data
- Uses Node.JS and Express to handle requests
- Wrote API docs for the mobile team to utilize provided functions
